PROFILE

Commercial analyst with two and a half years' experience across Dublin, New York and London, now focused on brand strategy and partnerships in music and entertainment. At Atlassian Williams Racing I built the partner targeting tool a commercial team chasing £5m+ sponsors uses every week to decide who to call, and since then I have worked on site with artists, their managers and event producers at live events. I read engagement, audience and financial data to show where a brand should put its money and what makes a partnership close, then turn it into the decks and dashboards senior stakeholders act on. I work in Salesforce, Python, SQL, Excel and PowerPoint, and hold an MSc in Business Analytics from UCL.

WORK EXPERIENCE

Atlassian Williams Racing (Formula One) **May 2026 to Sep 2026**

Data Analyst, Commercial Insights and Strategy (MSc industry project, graded 71%) | London, UK

- **Partner Targeting Model:** Built a machine learning model in Python on 340,000+ historical sponsorship deals, scoring 13,296 companies weekly inside Salesforce for a team targeting £5m+ sponsors. The top 10% of scores held 84% of future sponsors, an 8x richer prospect pool.
- **What Closes Partnerships:** Modelled 926 partnership opportunities and 38 signed deals: renewals and warm agency introductions roughly doubled monthly closure rates, and opportunities with no proposal never closed.
- **Brand Evidence Cards:** Read 60.8 million rows of global news in SQL on BigQuery for signals such as mergers and leadership change, so the first conversation with a brand is about its priorities.
- **Built With the Sales Team:** Ran three review rounds with sales reps of fifteen to twenty years' experience, presented recommendations to the commercial team and handed over a tool that refreshes weekly on BigQuery for under a dollar a run.

Live Events and Awards (freelance) **Sep 2026 to present**

Events Runner and Artist Liaison | London, UK

- **Artist and Guest Liaison:** Point of contact between artist managers, event producers and company executives for headline acts, presenters and VIP guests at the Attitude Awards (Roundhouse, with Stream Publishing's events team), the AVA Conference and a Rolling Stone UK event.
- **On the Day Operations:** Handled schedules, arrivals, green rooms and last minute changes, trusted by managers and producers to get things done quietly.

Northwell Health / Northwell Holdings **Oct 2024 to Sep 2025**

Executive Fellow (Business Development, Ventures and Global Partnerships) | New York, USA

- **Business Development:** Worked to revenue targets to keep a non-profit service at break-even after US insurance legislation cut funding it relied on, analysing which services to expand.
- **Partnership Management:** Day to day contact for an Irish health tech start-up entering the US market, coordinating its first clinical trial with Enterprise Ireland and trade boards.
- **Executive Reporting:** Chief of staff on a $32M expansion, building the weekly KPI dashboards (Python, SQL, Excel) leadership used for decisions, and supported a $1M+ innovation challenge.

Arup **Aug 2023 to Sep 2024**

Strategy and Insights Consultant | Dublin, Ireland

- **Stakeholder Workshops and Business Cases:** Day to day contact for government clients on €2M+ zero emission transport programmes, running workshops and tender evaluations and turning policy priorities into business cases and delivery plans; built the EV charging demand forecast for the Department of Transport.

SELECTED PROJECTS (live demos on my portfolio)

- **Music Brand Partnership Strategy (Oct 2026):** Built a fan loyalty index for 73 artists (53 Beggars Group acts and 20 comparators) from Chartmetric, Spotify and YouTube data, compared music and sport on reach outside the home market and cost per fan, and wrote tailored partnership pitches for LEGO, Red Bull and a record label. Reported the finding that went against the pitch: Beggars acts hold their fans better, but are not growing faster.
- **Fan Intelligence Platform:** Classified 4,827 fans of five artists from four platforms into four behavioural archetypes, so labels and brands can plan campaigns by community.

EDUCATION

University College London (UCL) **Sep 2025 to Sep 2026**

MSc Business Analytics (Distinction, equivalent to a 1:1 First Class Honours). Segmentation, A/B testing and forecasting; dissertation with Williams Racing.

Trinity College Dublin **Sep 2019 to Aug 2023**

BSc Engineering (2:1, Upper Second Class Honours)

SKILLS

Brand and Partnership Strategy: Sponsorship pipeline analysis, partner targeting, audience and fan segmentation, reach and cost per fan comparisons, partnership pitch decks, artist and guest liaison.
Stakeholder Management: Day to day contact for partners, clients and artist managers; presenting to senior commercial and non-technical stakeholders.
Tools: Salesforce, Excel, PowerPoint, Notion, Python, SQL, Spotify and YouTube APIs, Claude and other AI tools.
